

Journal of Diabetes & Metabolism

I am interested in joining editorial board of your Journal (Journal of Diabetes & Metabolism).

Here are the required documents:

1. Current curriculum vitae: Attached
2. Areas of expertise/specialty classification listing:
 - Endocrinology, diabetes and metabolism: Diabetes, thyroid disorder, adrenal disorders
 - Geriatric Medicine: Osteoporosis, dementia
 - Internal Medicine
3. Brief summary outlining previous peer review/editing experience and one's interest in being selected as an editorial board member:
 - I reviewed American Geriatrics Society Annual Scientific Meeting proposals this year.
 - While I foresee my primary role being that of clinician, my continued involvement in academic medicine and clinical research will help to ensure optimal outcomes for my patients. Not only I plan to keep abreast of important advances in the field, but also I aspire to contribute to evidence –based medicine by conducting my own research and peer reviewing clinical studies.

I would appreciate if you could consider my application for editorial board member. Looking forward to hear from you soon.
