Dear Editor,

I would certainly be interested in serving as an editorial member for your journal. I am attaching my CV, passport size photo (I'm assuming it is the correct size but please let me know if you want it smaller), and my biography.

Please let me know when and if this approved.

Thank you!

Carol

Dear Dr DeNysschen Carol A,

Greetings from the Journal of Obesity & Weight loss Therapy

Thank you very much for your interest towards our journal

If you are interested to serve as a Editorial board member for our journal, you are requested to send a recent passport size photo (to display at our website) and your CV, Biography (150 words), Research Interests for our records.

Warm regards
Editorial office-JOWT

Dear Editor, Due to circumstances beyond my control at this time, I am unable to review this manuscript in a timely manner. You can contact me in the future for other reviews but the time constraint can not be met for JOWT-11-777. Dr DeNysschen Carol DeNysschen, PhD, RD, MPH, CDN Assistant Professor, Dept. of Nutrition & Dietetics Buffalo State College Adjunct Faculty, Dept. of Nursing, University at Buffalo Buffalo State College, SUNY 102 Caudell Hall 1300 Elmwood Avenue Buffalo, NY 14222 denyssca@buffalostate.edu

From: editor.jowt@omicsonline.org [editor.jowt@omicsonline.org] Sent: Wednesday, December 14, 2011 5:03 PM To: DeNysschen, Carol A Subject: Reviewer Invitation [http://omicsgroup.info/editorialtracking/obesity/images/header.jpg]

Dear Dr. Dr. Carol Denysschen You have been invited to review a manuscript for Journal of Obesity & Weight loss Therapy I would be grateful if you would review a paper entitled Height-related blood pressure reference values for Shiraz (Southern Iran) school children for this journal. This is the abstract: Introduction: Blood pressure in children can be affected by a lot of factors such as environmental, cultural, social and genetic factors. This study aims at comparing Blood pressure in Shiraz (Iran) children with American standards and also to determine Blood pressure smoothed centiles on height in 6.5-11.5 elementary school children for the first time. Method: Height, systolic Blood pressure and diastolic Blood pressure were measured with standard methods in 2270 elementary school children that were selected by multistage sampling. We produced Blood pressure percentiles on height percentiles and compared them with National High Blood Pressure Education Program results by using its suggested regression equation. Meanwhile, Blood pressure smoothed centiles on height were drawn by Healy-Rasbash-Yang method. Results: The results of this study showed that Blood pressure levels in Shiraz children were lower than global standards. Then the measurements were adjusted for height, and no significant correlation found between either systolic Blood pressure or diastolic Blood pressure and age ($r = -0.03$ and $p = 0.15$ for systolic Blood pressure, $r = -0.005$ and $p = 0.8$ for diastolic Blood pressure). Discussion: Due to significant differences between Blood pressure in Iran and American children, it is suggested to use local Blood pressure standards. And also it was decided to produce Blood pressure percentiles on height instead of age because it seems that it would lead to better evaluation for real hypertensive diagnosis. If you would like to review this paper, please click this link: ACCEPT_REVIEW_INVITATION If you do not wish to review this paper, please click this link: DECLINE_REVIEW_INVITATION If the above links do not work, please go to <http://omicsgroup.info/editorialtracking/obesity/Review.php> Your Email Id is denyssca@buffalostate.edu and your password : YNxdv4bP. The manuscript reference is JOWT-11-777 If possible, I would appreciate receiving your review by Wed , 28-Dec-2011 (IF JOURNAL IS IN 'INVITATION MODE'). If possible, I would appreciate receiving your review in 14 days (IF JOURNAL IS IN 'AGREED MODE'). You may submit your comments online at the above URL. There you will find spaces for confidential comments to the editor, comments for the author and a report form to be completed. With kind regards, Rachael J.
