

To
The Editorial Board,

I am writing this email to express my interest in being associated with Journal of Immunobiology as a member on Editorial Board/reviewer.

I am Deepa Rana Jamwal, PhD, in Immunology, currently working as a Research Associate at the University of Arizona, USA. I have had a chance to get my post doctoral training in Dr Jeffrey Frelinger's lab after which I joined Dr Faye Ghishan's lab as a research associate. My specific interests are innate immunology, host pathogen interactions and autoimmune diseases (mainly IBD).

I have published 8 papers and 4 abstracts in reputed journals. I am already a reviewer with OMICS/CLINICAL . At this point it would be great boost for my career to be associated with this journal.

I am attaching my CV for your consideration and hopefully I would hear back from you soon.

Thanks

Deepa
