Subject: RE: Decision About continuing as Editorial Board member!

Importance: High

Dear Sushee:

I would be very glad to keep being part of the editorial board membership of the Journal of Aquaculture Research and Development. I have been honored of being collaborative with this journal. However, I would like to request a more active participation with the journal. Please feel free to contact me whenever is necessary.

In addition, because of the huge load of work that I have in the next coming days, I probably won't be able to send the requested editorial for the upcoming issue. But I will try to send one in brief. Just let me know the guidelines to follow and a specific topic regarding aquaculture to develop. My expertise is in shrimp diseases.

Best regards.

Dr. Arturo Sánchez
