## **Suggestion or proposal:**

Best wishes to the journal for publication of quality articles in the field of cancer research. I would like to mention that publication in JCM provides immediate access to research results for the scientific community. Those of us with, or having had, NIH funding have experienced a fair and rapid review of research and are grateful for the caliber of the peer review process. If I was to make one proposal, it would be to host a small regional scientific meeting for those who have published in JCM to present their current research and publish a meeting abstract issue. If the meeting could focus on graduate student research we would be giving back to the community and encouraging the next generation of researchers to choose JCM to publish with.
