Suggestion or proposal:

Best wishes to the journal for publication of quality articles in the field of inflammation and related responses. I would like to mention that knowledge in other fields of medicine can usefully be transferred in personal clinical areas. This is the basis of Integration, a new philosophy of science.

The Interdisciplinary Journal of Microinflammation will promote an integrative vision in medicine, that is a combination of conventional medicine and other healing modalities not commonly taught in Western medical schools. In addition to incorporating all of the incredible advances of medicine and technology, integrative medicine emphasizes nutrition, life-style, and attention to mind-body influences.
