Suggestion or proposal:

Best wishes to the journal for publication of quality articles in the field of Bioethics & Morals. I would like to mention that

Not sure this is really a 'proposal'. The journal already has a very wide remit, and rightly so. A focus on contemporary debates about moral particularism and virtue might help open up debates about the links between these movements in mainstream philosophy and debates in person-centred care, bringing out the links between theory and practice, and also ethics and epistemology in health care.
