

Dear Anna,

Thank you very much for your kind email. Please find attached cv and foto. I put the biography and research interest in the body of this email.

Thank you,

Have a wonderful evening

Sincerely,

Mohammad Shahidul Makki

Northeast Ohio Medical University,

Rootstown, OH, USA

Biography

Mohammad Shahidul Makki is a research scientist at Northeast Ohio Medical University, Rootstown Ohio, USA. He received his Ph.D from Leibniz Institute for Age Research-Fritz-Lippman Institute, Jena, Germany on Molecular Genetics. As a graduate student he worked on multiple projects including nuclear reprogramming, characterization of gonadal cell lines, kidney development and histone deacetylase mediated gene regulation and clinical implications. He moved to MD Anderson Cancer Center, Houston Texas, USA for his postdoctoral studies, where he showed the role of USP18 a protease in the regulation of Wt1 and tumorigenesis. Currently as a research scientist he is working on molecular basis of arthritis pathogenesis. His work is mainly focused on role of interleukin and RNA binding proteins, identification of novel miRNA by next generation sequencing in osteoarthritis pathophysiology.

Research Interest:

His work is focused on the role of interleukin and RNA binding proteins, transcription factors and regulation of osteoarthritis genes, identification of novel miRNA by next generation sequencing in osteoarthritis pathophysiology.

Dear Dr. Mohammad Makki,

Greetings from Journal of Arthritis

We request you to send a recent passport size photo (to display at our website) and your C.V, Biography (150 words), Research Interests for our records.

We look forward to a close and lasting scientific relationship for the benefit of scientific community.

With Kind Regards,

Anna
