FMH Neurologie
Arztlicher Direktor Neurologie

Proposal:

Best wishes to the journal for publication of quality articles in the field of Neurorehabilitation.

I would like to mention that it is very important to further research in Neurorehabilitation, in order to facilitate our evidence based approach to rehabilitation medicine. In addition, interesting cases seem also worth while as publishing these is a kind of "indirect experience" to be gained by the reader and is liked by most people as it is close to their clinical work.
