

Dear editor,

Sorry to bother you. My name is Yige and I am a research scientist at Columbia University. I am writing to find out opportunity to serve as an editorial board member for the journal of Single Cell Biology.

In the past few years, I have reviewed 15+ articles for several OMICS International journals, along with some other scientific journals, such as Medicinal Research Reviews, The FASEB Journal and PLOS ONE. I like the work very much, and I really enjoyed reviewing manuscripts, evaluating other's work and providing opinions and advice. During the 10+ years of scientific training, I have worked on several projects, and have gained professional knowledge in the field of cell biology broad in scope (areas of interest and expertise: cell cycle and cell growth, kinase, phosphorylation, mitosis, chromosome segregation, kinetochore, checkpoint, aneuploidy, cytoskeleton dynamics, molecular motors, intracellular trafficking, G protein, etc). I am interested in the majority of topics covered by "Single Cell Biology", and I believe I have the expertise and capability to serve as an editorial board member. As a young scientist, I hope to contribute to the field, and to build up networks as well as reputation for my future career. As such, I really appreciate it if you can consider me as a potential editorial board member for the journal.

I have also included my brief CV for your reference. Please feel free to let me know should you need more info from me. Thanks a lot for your attention and I look forward to hearing back from you soon.

Best regards,  
Yige
