Automobile Engineering is a branch of vehicle engineering, incorporating elements of mechanical, electrical, electronic, software and safety engineering as applied to the design. The journal provides an open access platform to deal with the designing of vehicle, manufacturing new products, repairing and servicing vehicles.

The Advances in Automobile Engineering (AAE) under the Open Access category is peer-reviewed journal that encompasses all basic, fundamental aspects and advanced aspects of Automotives.

AAE explicates development in automobile engineering, which is the sign of rise in industrialization; the advances in it will not only reduce the operating cost but also add standards in comfort. The Journal is promptly available, and is freely accessible globally through internet to share the innovations of the researchers for scholarly advancement in this field.

Advances in Automobile Engineering - Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at
