In Vitro Fertilization (IVF) is a process by which egg cells are fertilized by sperm outside the body: in vitro. The process involves hormonally controlling the ovulatory process, removing ova (eggs) from the woman's ovaries and letting sperm fertilize them in a fluid medium.

The Journal of Fertilization: In Vitro (JFIV) is an Open Access online journal which publishes original research articles, reviews and short articles in In vitro fertilization on internet which are easy to access and freely available.

The Journal of Fertilization: In Vitro aims to provide a complete source of authentic information about the current developments in the field of reproductive medicine. The contents of the journal are freely accessible through internet and promptly available to share the innovations of researchers and scholars for the progress of reproductive medicine.

Journal of Fertilization: In Vitro - Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at http://www.omicsonline.org/submission
