Nephrology is a branch of internal medicine and pediatrics dealing with the study of the function and diseases of the kidney. Nephrology concerns the diagnosis and treatment of kidney diseases, including electrolyte disturbances and hypertension and the care of those requiring renal replacement therapy, including dialysis and renal transplant patients.

The Journal of Nephrology & Therapeutics is an international, peer-reviewed journal overlays the development of new therapeutics for kidney diseases. The Journal of Nephrology & Therapeutics under open access publication encompasses manuscripts containing original research articles of authentic information and research includes the latest advanced innovative methods of the researchers which are freely accessible without any access boundaries to all internet users globally.

Journal of Nephrology & Therapeutics elaborates the function and diseases of the kidney and the applications of the therapeutics towards renal diseases. The contents of the journal ensures full text, quality controlled concordant format and also renders the authoritative summaries of substantial novel developments by the researchers including critical evaluation of advanced innovative methods and techniques.

Journal of Nephrology & Therapeutics - Open Access uses online manuscript submission, review and tracking systems for quality and quick review processing. Submit your manuscript at http://omicsgroup.info/editorialtracking/nephrology/SubmitManuscript.php
